

Lesson plan

Target: Use infinitives for reason

Objectives:

- Learn how to use the infinitive to give reasons.
- Justify actions using infinitives.
- Talk about photosynthesis and how it helps us.

Vocabulary: Needles, forests, sugar, large, roots, stuff, wood, storing, breathe, fuel, sunlight, leaves.

Before watching

Warm up: Active prior knowledge

Have students to ask to five classmates what is their favorite food. Write some answers on the board. Then, ask randomly to some students what some animals eat, then ask what plants eat.

While you watch:

- Have students to pay attention to how photosynthesis process is carried on.
- Pause the video as necessary.
- Have students list some parts of the plant.

After watching:

Have students to complete the graphic organizer. Then check the answers.

Present

Write on the board the sentences with the infinitive to give reasons and explain the use of it.

Practice

Have students to match the columns and share their answers with a partner. After that, ask students to complete the sentences justifying them with the infinitive. Check their answers and write some on the board.

Extend

- Have students to form small groups, tell them to ask each question to each other, when groups are finished, ask them to share their answers.
